

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Summary of Key Findings

Property:	3817 W FM 917, Joshua, Johnson County, Texas
Approximate Acreage:	650 acres
Assessment Date:	March 26, 2018
Environmental Firm:	TBK Environmental
Standard:	ASTM E1527-13 / All Appropriate Inquiry (AAI)

EXECUTIVE SUMMARY

TBK Environmental conducted a Phase I Environmental Site Assessment of the approximately 650-acre property in Joshua, Johnson County, Texas — the site now known as the Silo Mills residential development. The assessment was performed in full compliance with ASTM Standard E1527-13 and All Appropriate Inquiry (AAI) requirements.

CONCLUSION: No significant environmental concerns were identified. No further investigation is required.

KEY FINDINGS

- No Recognized Environmental Conditions (RECs) identified.
- No adverse environmental observations during site inspection.
- No evidence of contamination, unusual odors, or distressed vegetation.
- Natural gas wells on-site reviewed and noted without significant concern.
- All relevant environmental databases reviewed — no flags identified.
- Assessment fully compliant with ASTM E1527-13 and AAI standards.

SITE OBSERVATIONS

At the time of assessment, the property was vacant land. Five natural gas well pads, drilled between 2004 and 2006, were present on-site. These wells appeared inactive. No signs of releases, spills, or environmental impairment were identified during the physical inspection.

ASSESSOR STATEMENT

“No significant environmental concerns present; no further investigation required.”
