

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Summary of Key Findings

Property:	Silo Mills (Phases I–IV), Burleson / Cleburne, Johnson County, Texas
Approximate Acreage:	830 acres
Site Inspection Date:	October 8, 2020
Report Date:	October 25, 2020
Environmental Firm:	TBK Environmental
Standard:	ASTM E1527-13 / All Appropriate Inquiry (AAI)

EXECUTIVE SUMMARY

TBK Environmental conducted a Phase I Environmental Site Assessment of the approximately 830-acre Silo Mills development in Johnson County, Texas. The assessment was commissioned by Silo Mills Investment I–IV LLC in connection with financing through Bank OZK, and was performed in full compliance with ASTM Standard E1527-13.

CONCLUSION: No significant known or suspected Recognized Environmental Conditions were identified. No further environmental study is deemed necessary.

KEY FINDINGS

- No Recognized Environmental Conditions (RECs) identified.
- No Chemicals of Concern identified anywhere on the property.
- Former landfarm operations reviewed in full — all permitted levels followed; deemed not a concern.
- No regulatory enforcement actions identified.
- Vapor Encroachment Screening confirmed unnecessary.
- No unusual odors, standing water, or evidence of releases observed during inspection.
- Assessment fully compliant with ASTM E1527-13 and AAI standards.

SITE OBSERVATIONS

A physical inspection was conducted on October 8, 2020. Eight natural gas well pads were observed on-site. No significant environmental impact was identified during the inspection. No unusual odors were detected. No standing water, chemical spills, or releases were observed. The site presented no visual indicators of environmental impairment of any kind.

FORMER LANDFARM: HISTORICAL RECORD REVIEW

Environmental database searches identified historical landfarm permitting records associated with the property. TBK Environmental conducted a full review of these records. The review confirmed:

- All landfarm operations were conducted under proper state regulatory permits.
- All permitted levels and regulatory requirements were followed throughout the facility's operation.
- No enforcement actions of any kind were issued against the facility.
- The former landfarm was deemed not a concern in connection with the subject property.

ASSESSOR STATEMENT

“This assessment has not revealed any significant known or suspected Recognized Environmental Conditions in connection with the subject property... no further study deemed necessary.”
